-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on Feb. 23, 2004 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 5319867 (Weber) in view of [pages 1-7 of PORON 90, The Ultimate in Cushioning. The Ultimate in Performance] and [PORON 4000 Performance Urethanes –90 Series – Typical Properties]. The last two references will be referred to as Rogers in the rejection below.

Weber teaches a moisture wicking fabric layer (14) having elongated fibres (20,22) and a lower foam cushioning layer (12) substantially as claimed except for the foam layer having the characteristics as claimed. Weber teaches the cushioning layer

Art Unit: 3728

could be made out of a plurality of different materials; see col. 4, lines 1-14. Rogers teaches an insole made out of the exact foamed Poron material used by applicant, see paragraph bridging pages 2 and 3 of the instant application. Rogers teaches "PORON 90 controlled rebound products can be fabricated and **laminated with other materials** to create unique performance composites", bold face added. It would have been obvious to construct the foam layer (12) of Weber out of the Poron foamed material, as taught by Rogers, to provide improved cushioning characteristics. The fibres inherently contribute to distributing the load.

### ***Response to Arguments***

4. Applicant's arguments filed Feb. 23, 2004 have been fully considered but they are not persuasive.

Applicant argues Weber teaches the cushioning material made out of springy type of material.

To the contrary, nowhere does Weber indicated the material is springy or has to be springy.

### ***Conclusion***

5. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including:

--"The reply must present arguments pointing out the *specific* distinctions believed to render the claims, including any newly presented claims, patentable over any applied references."

--"A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section."

-Moreover, "The prompt development of a clear issue requires that the replies of the applicant meet the objections to and rejections of the claims.

**Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06" MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.**

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>.
